

Grade: 97.5 / 100

General (30%):

1. Provided Xcode project was utilized and can be run without modification (30%)

Key Concepts (70%):

1. MainViewController was implemented as specified (10%)
2. DetailViewController was implemented as specified (10%)
3. ModalViewController was implemented as specified (10%)
4. Implementation utilized the storyboard appropriately (20%)
5. Delegate pattern was implemented correctly (10%): 7.5%
 - The methods in a delegate pattern are typically named starting with the name of the object that the delegate pattern is for and take a parameter of that type, so a good example of such a method in this case would be `modalViewControllerDidFinish(modalViewController: ModalViewController)`.
6. Presentation count was implemented correctly; as a class/static property of DetailViewController or as an instance property of MainViewController whose value was passed during `prepareForSegue:sender:` (10%)
