Goal:
The goal of this assignment is to become more familiar with the Auto Layout system by using it to solve layout problems.

Deliverables:
A modified version of the provided project pushed to origin master by the due date specified which solves the included layout problems. During your development of the solutions to the problems, you must commit code changes with a reasonable comment indicating what has been implemented a minimum of 3 times (ideally once per problem). The program must also be based on the provided project and only changes to the file "Main.storyboard" should be made. There should be no code changes.

Note:
There is a specific PDF for each problem provided which shows the desired layout.

Documentation:
"Xcode Overview"
"Auto Layout Guide"
"NSLayoutConstraint"
